INTERNSHIPS AND PROJECTS

Cambridge Judge Business School | Cambridge University | Research Intern [Apr '23 - Jun '23]

Overview-Toiled up on gathering and analyzing the data to help a micro enterprise to grow its customer base using YouTube promotions
•Derived many useful insights from **500+** datasets using machine learning techniques to **increase** their YouTube channel growth by **700%**
•Expanded their offline customer base by **200%** which significantly increased their revenue from the shop and YouTube channel by **250%**

Eduversity of Danmark | Research and Marketing Intern [May '23 - Jun'23]

Overview-Engaged in designing the content for the upcoming courses and making Instagram and YouTube content for their promotion
•Contributed to **3** courses and worked on **100+** questions related to Front-end web development, C++ and Data structure and Algorithms
•Spearheaded **45+** deals on the courses which helped to escalate the sales of the courses by **160%** by locking **30+** deals in **2** months

Fraud Detection in Credit Card Applications | Self Project [Dec '23 - Jan '24]

Overview-Implemented a predictive model to identify fraudulent credit card transactions using logistic regression on Kaggle dataset
•Expertly trained a fraud detection model on a **highly imbalanced** dataset of **2,84,807** transactions to utilize it for anomaly detection
•The model achieves a high accuracy of **94.72%** and balanced precision of **94.92%**, indicating effectiveness on both types of transactions
•The confusion matrix reveals a low number of **false positives(6)** and **false negatives(8)**, suggesting the model's reliability and accuracy

Movie Recommendation System | Self Project [Feb '24 - Mar '24]

Overview-Built a content-based recommendation system that suggests movies based on similarity of features such as genres etc
•Pre-processed the data by applying **CountVectorizer** to effectively convert categorical features into numerical vectors for further analysis
•Used **cosine similarity** to analyze movie vectors and accurately predict the **top 3** recommended movies based on users' preferences
•Applied **Natural Language Processing (NLP)** techniques to effectively transform textual data into meaningful numerical representations

Bitcoin Price Prediction Web Application | Self Project [May '24 - Jun '24]

Overview-Created a stock price prediction model to increase portfolio returns using LSTM and R-Neural network for accurate prediction
•Utilized advanced strategies as **early stopping** and **dropout** to mitigate overfitting and enhance the overall performance of the model
•Enriched the model's predictive capabilities through the acquisition of different features, like **mov_avg** and **adj_close** into it's framework
•Innovated a web application using **streamlit** for the prediction of any stock price while showing plots of **original price vs mov_avg**

SKILLS AND EXPERTISE

Programming Languages/Libraries: C | C++ | Python | Numpy | Pandas | Matplotlib | Seaborn | Scikit Learn | Keras | Tensorflow
Software and Tools: VS Code | Jupyter Notebook | Github | MS Office | Google Colab | VS Code | Canva | MS Powerpoint | MATLAB

COMPETITION/CONFERENCE

2nd Runner Up | General Championship Case Study 2024 | IIT Kharagpur [Mar '24 - Apr '24]

•Analyzed Bajaj's distribution model and developed a **AAA strategy** for the Indian spare parts market, increasing market share by **21%**
•Strategically identified advertising locations using a **weighted score framework**, boosting market reach and advertising efficiency by **12%**

National Finalists | Yudhshastra Case Competition | IIM Bangalore [Mar '24 - Apr '24]

•Among the **top 7** out of **1800+** teams that had participated in the nationwide case competition by finding new types of chemical solutions
•Designed an optimized **supply chain and expansion strategy** for a sowing startup **reducing** wastage by **15%** and product cost by **27%**

POSITIONS OF RESPONSIBILITY

General Secretary | Alumni Affairs | RK Hall | IIT Kharagpur [Jul '23 - Jul '24]
